

The Same Field at Every Scale

QM SEES

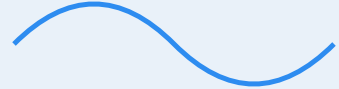

High-frequency oscillation
Vacuum fluctuations
Zero-point energy

SAME FIELD

$$G(t) = 10^{-3} + 10^{-4}\cos(2\pi t)$$

GR SEES

Low-frequency gradient
Spacetime curvature
Dark energy

The cosmological constant problem dissolves: vacuum energy IS dark energy.

Planck scale (10^{-35} m)

Atomic → Stellar

Cosmological (10^{26} m)

SCALE →
