

G(t) Scalar Field Visualizer

Unified Scalar Time-Gradient Field Theory — interactive exploration

Field Definition

$$G(t) = A_{\text{base}} + A_{\text{amp}} \cdot \cos(2\pi \cdot t)$$

BASE AMPLITUDE (A_BASE)

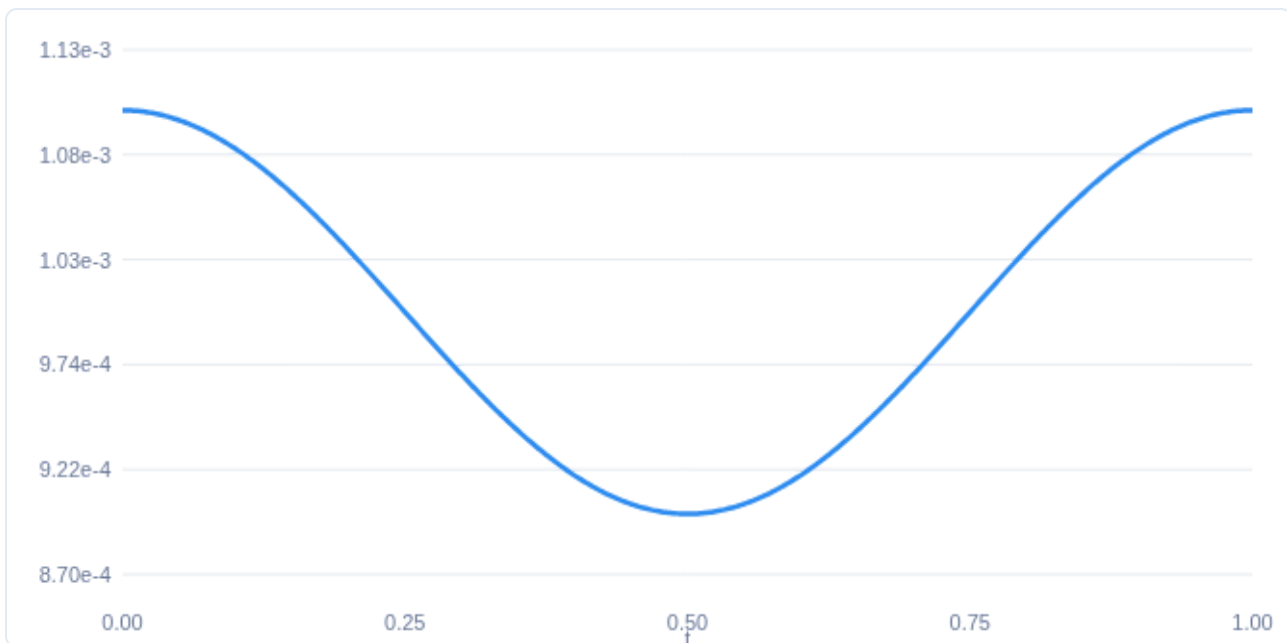

1.000e-3

OSCILLATION AMPLITUDE (A_AMP)

1.000e-4

G(t) over t ∈ [0, 1]

MIN G(T)

9.0000e-4

MAX G(T)

1.1000e-3

MEAN G(T)

1.0002e-3

PEAK-TO-PEAK
2.0000e-4

Fractional Deviations

DECAY $\Delta\lambda/\lambda_0$; (C=1.0)
+/- 1.000e-3

GRAVITY $\Delta g/g_0$; (C=0.5)
+/- 5.001e-4

INERTIA $\Delta A/A_0$; (C=0.5)
+/- 5.001e-4
