

## Frame Dragging: Rotation Is Global, Relative Phase Preserved

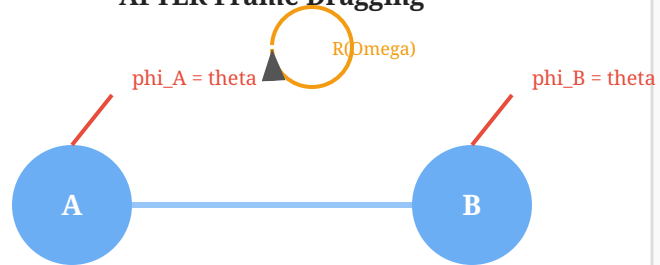

### BEFORE Frame Dragging

$$\text{phi}_A - \text{phi}_B = 0$$

Entangled: YES

### AFTER Frame Dragging

$$\text{phi}_A - \text{phi}_B = 0 \text{ (unchanged)}$$

Entangled: YES

$R(\text{Omega})$  is unitary:  $|R \psi| = |\psi|$ . Same  $R$  for both endpoints. Relative phase unchanged.
